SUMMARY

Computer Science Engineering graduate skilled in MERN Stack Development, Data Structures Algorithms, and Full-Stack Web Development. Hands-on experience in designing and developing scalable applications, RESTful APIs, and real-time systems. Strong foundation in programming, problem-solving, and teamwork, with a passion for learning new technologies and building impactful software solutions.

EDUCATION

Rungta college of engineering and technology

Bachelor of Technology in Computer Science (Data Science)

Bhilai, Chhattisgarh

Aug. 2022 – Jun 2026

Maltidhari College

Senior High School (BSEB) — Percentage: 71.8%

Naubatpur, Patna

Aug. 2020 – May 2022

High School Sain

Secondary School (BSEB)— Percentage: 69.8%

Sain, Patna

Aug. 2018 – May 2020

PROJECTS

RED RESERVE | *React, Node.js, Express.js, MongoDB, Redux, JWT, Postman* [\[GitHub\]](#) [\[Demo\]](#) Nov 2025 – Jan 2026

- Implemented role-based authentication using JWT, providing secure access to distinct features and data for donors, hospitals, and organizations.
- Designed a maintainable backend using MVC architecture, ensuring clean code structure and separation of concerns.
- Integrated Redux Toolkit for efficient state management and smooth API communication with the backend using Axios.
- Developed customizable inventory management features enabling addition, removal, and modification of blood inventory records.

VIBELY | *React, Node.js, Express.js, MongoDB, Stream Chat API, JWT, Postman* [\[GitHub\]](#) [\[Demo\]](#) May 2025 – Jun 2025

- Built a full-stack social networking application using the MERN stack with Stream Chat API integration for real-time messaging.
- Implemented secure authentication using JWT along with friend request functionality and personalized onboarding workflows.
- Designed a responsive and user-friendly interface, ensuring seamless real-time chat experience with reliable state management.

SmartEdu – E-Learning Website | *HTML5, CSS3, Bootstrap 5, JavaScript* [\[GitHub\]](#) [\[Demo\]](#) Oct 2024 – Nov 2024

- Designed and developed a responsive e-learning website to provide users with easy access to educational content across devices.
- Implemented structured course catalog, interactive lessons, and user-friendly navigation using Bootstrap 5.
- Built user authentication features including registration and login for personalized learning experiences.
- Developed additional functionalities such as instructor application form and contact-us module using JavaScript.
- Ensured cross-browser compatibility and full responsiveness for mobile, tablet, and desktop screens.

ACHIEVEMENTS

- Built impactful full-stack projects including **VIBELY**, a real-time social networking and chat application, and **RED RESERVE**, a Blood Donation Management System.
- Solved Data Structures and Algorithms problems across multiple platforms, strengthening problem-solving and analytical abilities.
- Participated in hackathons and technical contests while maintaining strong academic performance in Computer Science Engineering.

TRAININGS & CERTIFICATIONS

- Completed professional training in **Advanced Problem Solving & Data Structures and Algorithms with Java**, strengthening problem-solving skills and understanding of efficient algorithms.
- Successfully completed **MERN Full Stack Development (Intermediate Level)** training, gaining hands-on experience in building full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Applied acquired skills through practical assignments and capstone projects, enhancing software development, debugging, and teamwork capabilities.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, Express, Github, MongoDB, Tailwind CSS

Developer Tools: Git, Visual Studio, Render, AWS, Vercel, Netlify

Relevant Coursework: DSA, OOPs, DBMS
